CLEAN COIL PROGRAM

1. CLEANING

Clean condenser and evaporator coils with Nu-Calgon's quality products that are designed to restore original heat exchanger capability.

2. PROTECTION

Apply Nu-Calgon's *Cal-Shield*® with Teflon® to the evaporator and condenser coils to repel dirt and keep the coils cleaner longer.

3. CONTROL

Improve Indoor Air Quality by killing bacteria on evaporator coils, drain pans, and ductwork with *Evap-Fresh*® No Rinse or *Bio-Fresh*® cd.

4. PREVENTION

Place *Gel Tabs*, *Pan-Treat*, or *PanPads* in the evaporator drain pan. These products prevent biological growths and slime from clogging the drain.

Install iWave to prevent mold and bacteria on the coil and to reduce VOCs, odors, dander and airborne particles in the air.

Don't forget ClenAir by Nu-Calgon Odor Neutralizer or Odor Block to eliminate and prevent odors.
